Beveling - polishing machine
to obtain bevels from 1 to 10 mm.
Working angle 45°

TECNOLOGY FOR PLASTIC MATERIALS PROCESSING

The GAMMA polishing machine is designed and built to obtain a bevel of max. 10mm. leaving the surface perfectly polished.

On acrylics it can create bevels at 45° from 1 to 10 mm.

Description	U of measure	Measures
A	mm	500
B	mm	340
C	mm	380
Power supply	Volt	220
Max Power	Watt	550
Removal	mm.	5
Max. Bevel	mm.	10
Electro spindle speed	RPM	10.000
Weight	Kg	70

The peculiar characteristics of this machine are that it is small, compact and portable. Perfect for small parts and sheets.

Moreover it is very simple to make your work quick
